

## PROFILE

**Dr. Jesper Danielson, MD,**  
Director,  
Prof of Radiology,  
Capio S:t Görans hospital,  
Sweden.

Dr. Jesper Danielson is a Swedish radiologist and has been Director of Capio S:t Görans hospital ultrasound-unit since 2006. He received his specialization in radiology in 1999 and has concentrated on diagnostic abdominal ultrasound since 2002. Dr. Danielson has been teaching bedside ultrasound to non-radiologists, such as EM and critical care, since 2009. He is a co-founder of SonoSweden, a program dedicated to teaching diagnostic ultrasound in Sweden and Europe, and co-founder of the FIRST ULTRASOUND FELLOWSHIP in Sweden. He is also a co-founder and organizer of SonoSthlm. His main area of expertise is abdominal ultrasound, having significant experience with ultrasound contrast.

Dr. Danielson is happy to discuss anything ultrasound, but has the most experience with abdominal imaging. He most recently taught Matt and Mike how to find a normal appendix and diagnose terminal ileitis while all three were wearing kimonos in Sweden. He's also an avid birdwatcher with 3000 species on the world list, so if you see him in the branch of a tree outside your house, don't be alarmed.
