

PROFILE

Prof. Zhinan Chen, Ph.D.

Professor and Head,
Cell Engineering Research Centre & Department of Cell Biology,
Fourth Military Medical University,
China.

Professor Chen Zhinan is an outstanding cell biology, antibody engineering / cell engineering experts, the National 863 Program major expert group of experts, post-General Fellow candidates; incumbent China Anti-Cancer Association and chairman of the Committee of tumor markers, the Chinese Society of Cell Biology Member of Standing Committee of China Society of Biotechnology, Deputy Director of Antibody Engineering Committee of China Pharmaceutical Biotechnology Association, Member of New Drug Evaluation Committee of State Food and Drug Administration, Member of Military Medical Science and Technology Committee, Military Drug Evaluation Expert , Shaanxi Province, director of cell biology society.

In tumor cell biology, antibody engineering / cell engineering, bio-pharmaceutical and other areas of outstanding achievements, especially in liver cancer targeted drug research breakthrough, successively with the first complete national class I new drug certificate, military science and technology progress first class The National Science and Technology Progress Award, the "Ninth Five-Year", "15" logistics major scientific and technological achievements of the award 1; twice was named the National Health Science and Technology Top Ten News; The first outstanding scientific and technological workers in Shaanxi Province and so on, and won the military academy "Yucai Award" Gold Award; has taken the lead in the "15" National Science and Technology Major projects, "863", "973" program, the National Natural Science Foundation of key projects and NCI international cooperation projects 8 items; published SCI papers 39 to the first or the author published 30, the impact factor of more than 100, was Cited by 201 times; edited 4 books, won the national invention patent authorization 8, computer software copyright 1, new applications for national invention patent 7, PCT international patent 3; transformation of scientific research 3.
